Sizes of Roots—Prices quoted are for thrifty one-year-old roots, except as indicated by "div."

Divisions will be strong and have from two to five eyes. To persons wanting one-eye divisions we will meet any reliable growers' prices, as far as our stock justifies.

If any root sent out by us is not entirely satisfactory we will refund your money on its return and still be good friends.

We guarantee stock true to name, and in case of possible error will be responsible for the original cost only.

Selections—For moderate priced peonies we recommend the following—Festiva Maxima, Mons. J. Elie, Felix Crousse, Edulis Superba, Duchess de Nemours, La Perle, Baroness Schroeder, Livingstone, Madam Emile Galle, Grandiflora, Grover Cleveland, Karl Rosenfield, Reine Hortense, Venus.

We would be pleased to furnish further information to prospective buyers.

W. J. Engle & Son

We offer no bargain collections. Send a list of your wants: Peonies or Iris, and we will make the bargain.

Iris can be planted any time the ground is not frozen, but the best time is June and July. Both Peony and Iris should have a mulch of coarse litter, such as leaves or straw, the first winter.

Iris With a Future Before Them

Lent A. Williamson, Lord of June, Queen Caterina, Mother of Pearl, Souvenir De Mme. Gaudichau.

Planting Peonies—Can be done any time from September first, till the ground freezes. The choice time is from September 15th to October 15th.

Plant in sunny location, where ground is naturally or artificially well drained. Soil should be packed around roots so that buds on roots are covered from $2\frac{1}{2}$ to 3 inches deep.

If manure is used to enrich the soil it should be well decomposed and not come in direct contact with the roots, nor should it ever be over the crowns.

Raw bone meal is a safe fertilizer to use.

Do not plant nearer than ten feet to a privet hedge, 30 feet from a tree, 12 inches in diameter, nor near the base of buildings.

Commence planting Peonies this fall
Sept. 14th, 9 o'clock in the morning.
